

MagneShocks will make your car faster !

Our System will not only give you **TOTAL CONTROL over the “Launch”**

It will ALSO:

- Make your **burnouts easier & SAFER** (less throttle & less “darting”),
- Make your car **run straighter**,
- Improve **STABILITY** (everywhere),
- REDUCE or **ELIMINATE wheel-spin** on the top end,
- which will **increase MPH** and
- Increase **STABILITY & PREDICTABILITY** during Shut-down.

Drag Shocks have always been a Big COMPROMISE!

What you SET, is what you GET! (for Burnout, Launch, Mid-track, Down-track & Shutoff)

What are the CHANCES that ONE Setting is “Perfect” for ALL conditions? - **ZERO !! – NONE !!**

Now, you can have completely different shock settings for:

1. **Burnouts,**
2. **Launch,**
3. **Mid-track,**
4. **Down-track,**
5. **Shutdown**

In addition, you can have another group of settings, preset & instantly available “*at a flip of the switch*”,
(for: **Launch, Mid-track & Down-track**) for a different lane, other variable track conditions or simply “*testing*”.

Don’t be WORRIED!

1. **You won’t lose your BASELINE.**

We will **PRESET** the Controller to **YOUR baseline** – the SAME as your present shock settings.

2. **We will DE-MYSTIFY the “Electronic Box”.**

We will **SHOW YOU** how to adjust it to:

- A. **Improve your PRESENT setup.**
- B. **COMPENSATE** for varying track conditions.

When you purchase a MagneShock System, if you like, we will preset the Controller for you.

You can do any of the following – **FREE OF CHARGE:**

A. **Tell us what shocks you are presently running and the settings you use.**

If we already have dyno’d that shock and know what the damping force is, we will set your new Controller to “LAUNCH” at the SAME damping.

B. **If you already have dyno sheets on your shocks & present settings - Send us the specs.**

We will set the Controller to “LAUNCH” at the SAME damping.

C. **You can send us your shocks, set at your baseline.**

We will dyno test them (**FREE OF CHARGE**) and set your Controller to “LAUNCH” at the SAME damping.

We will also set ALL the other settings, which we believe will help your times, stability, consistency & SAFETY.

When in doubt – GIVE US A CALL.

Track support is always available.

Just give us a call to talk to one of our Technicians.

We will be happy to discuss YOUR car & YOUR problems – FREE OF CHARGE.

We will help you develop all the settings for MAXIMUM PERFORMANCE - from start to WIN
